DETAILED ACTION

Status of the claims

The claims initial submitted for the application were claims 1-12 and 14 –19. There was no claim 13 submitted. Claims 14-19 have been renumbered 13-18 respectively.

Therefore, the application now contains claims 1-18.

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, drawn to a method for determining cyclase inhibit parathyroid hormone in a sample, classified in class 435, subclass 7.1.
 - II. Claims 7-11, 17 and 18, drawn to a method for measuring the amount of cyclase inhibiting parathyroid hormone fragment in a sample and a kit, classified in class 435, subclass 7.94.
 - III. Claims 12, 15 and 16, drawn to a method for measuring cyclase inhibiting parathyroid hormone by means of a precipitating or turbidometric immunoassay, and a kit classified in class 436, subclass 518.
 - IV. Claims 13 and 14, drawn to a substantially pure antibody or antibody fragment sample, a labeled antibody or antibody fragment specific for a peptide sequence for cyclase inhibiting parathyroid hormone, classified in class 530, subclass 387.1.
- 2. Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In

the instant case, Invention II requires labeling the complex by means of adding a second antibody that has a label. Invention III requires a colloidal particle which can be used to detect a signal change. While none of the previously mentioned limitations are required for Invention I. Therein restriction is proper.

- 3. Inventions I and IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product as claimed can be used in a materially different process of using that product such as the process of invention II.
- 4. Inventions II and IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product as claimed can be used in a materially different process of using that product such as the process of Invention III.
- 5. Inventions III and IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different

process of using that product (MPEP § 806.05(h)). In the instant case, the product as claimed can be used in a materially different process of using that product such as the process of invention II.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for one group is not required for other restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gary W. Counts whose telephone number is (703) 305-1444. The examiner can normally be reached on M-F 8:00 - 4:30.
